#### DETAILED ACTION

## **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "a lower end of the holder" in line 13. There is insufficient antecedent basis for this limitation in the claims.

# Allowable Subject Matter

- 5. Claims 1-3 are allowed.
- 6. Claim 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 7. The following is a statement of reasons for the indication of allowable subject matter:

  The prior art of record neither shows nor suggests a panel provided so as to be translatable

  between a first position in which the center hole in the disk is brought near the fore-end of the

turntable, and a second position in which the disk is fitted onto the turntable; in combination with a stop supported pivotably on the panel, wherein a chassis is furnished with a release mechanism for pivoting the stop in a direction in which, in association with the panel pivoting from the first position to the second position, the stop comes out of abutment with the disk.

#### Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yoon (US Pat. No. 5187700) shows door 2 with clamping magnet 6 and chassis 1 with turntable 5, and folded rib of housing 10, wherein "rib 15 contacts with an inner surface of the front panel 1a when a 12D disc is loaded" (see col. 3, lines 23-26; see also Fig. 7), and wherein "front portions of columns 12, 12' contact with the inner surface 2' of the lower plate of the door 2 as shown in Fig. 4" when a 8D disc is loaded (see col. 3, lines 31-39).

Cho (US Pat. No. 5016236) shows a vertical type compact disc player comprising door 2, sliding bracket 4, and supporting pins 20 and 21 (see Figs. 6A-7B).

Koiwa et al (US Pat. No. 4969140) show a rotary disc loading mechanism comprising lid 2 and guide arms 21.
